

GUI Library Pricelist

Depending on what functions are needed for your project, you can choose from various packages of the Simplify Technologies GUI library. Packages contain a selection of the following components:

GUI library base package: ANSI-C functions for designing graphical user interfaces or printouts.

Module LCD driver monochrome: Monochrome driver for the frequently used S1D13706 / SSD1906, S1D13705 (SED1375), S1D13704 (SED1374), S1D13700, S1D13305 (SED1335) and T6963.

Module Touch: Functions for touch glasses (buttons and freely definable touch keyboards, drop-down menus etc.).

Package	Content	Price
Package "Display monochrome"	GUI library base package, module LCD driver monochrome, Converter	1990 Euro
Package "Display color"	GUI library base package, module LCD driver monochrome, extension for 8-bit colors for LCD controllers S1D13706, SSD1906, S1D13705, LPC2478/LPC1788 (16-bit)	2790 Euro
Package "Display monochrome + Touch"	GUI library base package, module LCD driver monochrome, module Touch	2790 Euro
Package "Display color + Touch"	GUI library base package, module LCD driver monochrome, extension for 8-bit colors for LCD controllers S1D13706 / SSD1906, S1D13705, LPC2478/LPC1788 (16-bit), module Touch	3490 Euro
Supplemental Package "Logger Framework"	Functions for measurement value representation in 2D x/y plots, based on functionality of the GUI library.	700 Euro

No runtime royalties: The source code licenses can be used without further royalties according to our license conditions.

Support und Documentation: All of our source code licenses come with 6-month telephone support after the license has been acquired and with comprehensive documentation in English or German.

Update and change of package: Within 24 months after the acquisition of the license of one package you may purchase an update for 25 % of the current price of the package. Within 24 months after the acquisition of the license of one package you can switch to a package with more functionality for the price of an update of your current package plus the difference of the package prices.

Because of the software and hardware platform available at Simplify Technologies we can offer attractive conditions for the following services:

- Display modules LCM2 and LCM3, complete with software for interfacing via a serial port. Various displays with or without touch glass, also sunlight-readable versions.
- Starterkits for the LCM2 and LCM3 display modules.
- Development of custom display and user interface units with or without touch input,
- Development of custom drivers for LCD and touch in C or assembler,
